

**Istanbul, Türkiye, 14.04.2025**

## **PRESS RELEASE**

- **MMZ Onur Boru Profil to Showcase Heavy-Duty Hollow Sections at Made in Steel 2025**

MMZ Onur Boru Profil, Türkiye's leading manufacturer of ERW (Electric Resistance Welded) hollow sections, is proud to announce its participation in Made in Steel 2025, taking place on May 6–8, 2025, at fieramilano Rho in Milan, Italy. As the company continues to expand its international footprint, this premier event presents a valuable opportunity to showcase its latest innovations in steel tube and profile production.

### **Unmatched Product Portfolio**

MMZ has made significant strides in delivering customized, high-performance steel solutions to construction, infrastructure, and manufacturing sectors across the globe. With a strong focus on large and heavy-duty profiles, MMZ is the first and only manufacturer in Türkiye producing:

- - Square profiles up to 500x500x18 mm
- - Rectangular profiles up to 500x400x18 mm
- - ERW pipes up to 406.4x16 mm

"Our mission is to offer not only the widest range of hollow sections but also tailored steel solutions that enhance our customers' production efficiency and reduce costs," said Mr.Adil Emrah Muftuoglu, Export Manager at MMZ Onur Boru Profil.

### **Innovations That Drive Efficiency**

- - Axle Manufacturing Solutions: MMZ's exclusive 140x140x14 mm square tubes eliminate the need for welded U-type profiles, significantly reducing production time and costs for axle manufacturers.
- - Formwork Profiles: With specialized MMZ PLYWOOD profiles, available in two scalable versions, the company provides durable and reliable components for formwork systems.
- - Bridge Construction Profiles: Trapezoidal (V type) profiles supplied by MMZ are already contributing to major infrastructure projects in Türkiye, Ukraine, and Serbia.
